

Implantable Miniature Telescope (IMT) Patient Questionnaire

1. Are you 65 years of age (or older)?
2. Is it impossible to read and recognize faces without the help of visual aids? (Visual acuity between 20/160 and 20/800.)
3. Do you have age-related macular degeneration (AMD) disease that cannot be treated in both eyes?
4. If you have wet age-related macular degeneration, was the last treatment more than six months ago?
5. Are you free of other vision-threatening eye diseases (besides well-controlled glaucoma)?
6. Do you have cataracts? (Cannot have had previous cataract surgery.)
7. Would you participate in a visual training and rehabilitation program in Pinehurst, N.C. both before and after implantation of the telescope?

Potential participants must answer 'yes' to ALL the above in order to schedule a screening examination.

Additional criteria will be assessed during a series of screening examinations with doctors from the IMT team.

If you have answered yes to all the questions, please request a screening appointment by calling Lisa Fulghum at **(910) 295-2100** or toll-free at **(800) 733-5357, ext. 881**.
